EXISTENCE RESULTS FOR NONLINEAR SECOND–ORDER q–DIFFERENCE EQUATIONS WITH q–INTEGRAL BOUNDARY CONDITIONS

THAMONWAN SAENGNGAMMONGKHOL, BUNJONG KAEWWISETKUL AND THANIN SITTHIWIRATTHAM

Abstract. In this paper, we present some new existence and uniqueness results for the q-integral boundary value problem of nonlinear q-difference equation. Our results are based on Banach's contraction principle and Krasnowselskii's fixed point theorem. An example is given to illustrate the advantage of our results.

Mathematics subject classification (2010): 39A05, 39A13.
Keywords and phrases: existence, q-derivative, q-integral, q-difference equation.
