PROPERTY OF GROWTH DETERMINED BY
SPECTRUM OF OPERATOR ASSOCIATED WITH THE
TIMOSHENKO SYSTEM WITH WEAKLY DISSIPATION

C.A. RAPOSO, J.E.M. RIVERA AND R.R. ALVES

Abstract. In this work, we consider the Timoshenko system with weakly dissipation, one dissipation, \( \phi_t \), on the transverse displacement and another \( \psi_t \), on the rotation angle of a filament of the beam

\[
\begin{align*}
\rho_1 \phi_{tt} - \kappa (\phi_x + \psi)_x + \phi_2 &= 0, \text{ in } (0,L) \times (0,t), \\
\rho_2 \psi_{tt} - b \psi_{xx} + \kappa (\phi_x + \psi) + \psi_t &= 0, \text{ in } (0,L) \times (0,t),
\end{align*}
\]

with initial conditions

\[
\phi(x,0) = \phi_0(x), \quad \phi_t(x,0) = \phi_1(x), \quad \psi(x,0) = \psi_0(x), \quad \psi_t(x,0) = \psi_1(x).
\]

In [13] was proved the exponential stability of the semigroup associated with this system, and now we prove the property of growth determined by spectrum of operator associated, present the type of semigroup and also indicate the best constant for the exponential stability.

Keywords and phrases: Timoshenko, \( C_0 \)-semigroup, spectrum, property of growth, stability.
