WELL-POSEDNESS AND REGULARITY OF THE CAUCHY PROBLEM FOR NONLINEAR FRACTIONAL IN TIME AND SPACE EQUATIONS

V. N. KOLOKOLTSOV AND M. A. VERETENNIKOVA

Abstract. The purpose is to study the Cauchy problem for non-linear in time and space pseudo-differential equations. These include the fractional in time versions of Hamilton-Jacobi-Bellman (HJB) equations governing the limits of controlled scaled Continuous Time Random Walks (CTRWs). As a preliminary step which is of independent interest we analyse the corresponding linear equation proving its well-posedness and smoothing properties.

Keywords and phrases: fractional calculus, Caputo derivative, Mittag-Leffler functions, fractional Hamilton-Jacobi-Bellman type equations.
