FINITE DIFFERENCE METHOD FOR SOLVING THE SPACE–TIME FRACTIONAL WAVE EQUATION IN THE CAPUTO FORM

Elham Afshari, Behnam Sepehrian and Ali Mohamad Nazari

Abstract. In this paper a space-time fractional wave equation on a finite domain is considered. The time and space fractional derivative are described in the Caputo sense. We propose a finite difference scheme to solve the space-time fractional wave equation. We discuss about stability and convergence of the method and prove that the finite difference scheme is unconditionally stable and convergent with $(\tau^2 + h)$, where $\tau$ and $h$ are time and space steps respectively.

Keywords and phrases: Fractional wave equation, Caputo fractional derivative, finite difference method, stability and convergence.
