

CONSTRUCTION MODELS OF GAUSSIAN RANDOM PROCESSES WITH A GIVEN ACCURACY AND RELIABILITY IN $L_p(T)$, $p \geq 1$

NATALIYA TROSHKI

Abstract. The model of some Gaussian random process which approximates it with a given accuracy and reliability in $L_p(T)$, $p \geq 1$ is constructed in this paper. The sub-Gaussian theory of random variables is used for finding the model with given accuracy and reliability.

Mathematics subject classification (2010): Primary 41A25; secondary 60F10.

Keywords and phrases: Gaussian random processes, accuracy and reliability, modelling, sub-Gaussian random variables.
