

COMPLETE (p, q) -ELLIPTIC INTEGRALS WITH APPLICATION TO A FAMILY OF MEANS

TOSHIKI KAMIYA AND SHINGO TAKEUCHI

Abstract. The complete elliptic integrals are generalized by using the generalized trigonometric functions with two parameters. As an application of the integrals, an alternative proof of a result for a family of means by Bhatia and Li, which involves the logarithmic mean and the arithmetic-geometric mean, is given. Moreover, it is shown that a particular relation holds for the generalized integrals.

Mathematics subject classification (2010): 33E05, 33C75, 34L10.

Keywords and phrases: complete elliptic integrals, generalized trigonometric functions, arithmetic-geometric mean, logarithmic mean, Gaussian hypergeometric functions, p -Laplacian.
