

## A REMARK ON $\varphi\text{-}|\overline{N}, q_n; \delta|_k$ SUMMABILITY

MEHMET ALI SARIGÖL

*Abstract.* In a quite recent paper Özarlan [2] has tried to get necessary and sufficient conditions in order that every  $\varphi\text{-}|\overline{N}, p_n; \delta|_k$  summable series should be  $\varphi\text{-}|\overline{N}, q_n; \delta|_k$  summable, which extends a result of Bor [1], but does not finalize. In this paper we have solved this open problem.
