

NEW BOUNDS ON CERTAIN FUNDAMENTAL INTEGRAL INEQUALITIES

B. G. PACHPATTE

Abstract. In the present note we derive new explicit upper bounds on some fundamental integral inequalities which can be used as tools in the study of a class of Volterra-Fredholm type integral equations. Some applications are also given to illustrate the usefulness of one of our results.

Mathematics subject classification (2010): 34K10, 35R10.

Keywords and phrases: new bounds, integral inequalities, Volterra-Fredholm type, integral equations, explicit bounds..
