

$a(x)$ -MONOTONIC FUNCTIONS AND THEIR INEQUALITIES

JOSIP PEČARIĆ AND KSENIJA SMOLJAK

Abstract. In this paper $a(x)$ -monotonic functions are defined and some inequalities for them are derived. Related analogues of the Lagrange and the Cauchy mean value theorems are also derived and means of the Cauchy type are generated. Furthermore, it is shown that the monotonicity of the Stolarsky means can be proved using the notion of generalized monotonic functions.

Mathematics subject classification (2010): Primary 26D10, Secondary 26D15.

Keywords and phrases: differential equation, $a(x)$ -monotonic function, $a(x)$ -monotonic inequality, exponential convexity, mean value theorems, Stolarsky means.
