SHARP $L^p$ HARDY TYPE AND UNCERTAINTY PRINCIPLE INEQUALITIES ON THE SPHERE

Abimbola Abolarinwa, Kamilu Rauf and Songting Yin

Abstract. This paper studies $L^p$-version of the Hardy type inequalities on the geodesic sphere of constant sectional curvature and establishes that the corresponding constant is sharp. Furthermore, the inequalities obtained are used to derive an uncertainty principle inequality and another inequality involving the first nonzero eigenvalue of the $p$-Laplacian on the sphere.

Keywords and phrases: Hardy inequality, best constant, geodesic, sectional curvature.
