POLYNOMIAL DIFFERENTIATION COMPOSITION OPERATORS FROM $H^p$ SPACES TO WEIGHTED–TYPE SPACES ON THE UNIT BALL

STEVO STEVIĆ* AND SEI-ICHIRO UEKI

Abstract. We characterize the boundedness, compactness, and estimate essential norm of a polynomial differentiation composition operator from the Hardy space $H^p$ to the weighted-type spaces of holomorphic functions on the unit ball.

Mathematics subject classification (2020): Primary 47B38; Secondary 47B33.

Keywords and phrases: Polynomial differentiation composition operator, Hardy space, weighted-type space, boundedness, compactness, essential norm.
