

ON THE GENERAL CASE OF BRANNAN CONJECTURE

LUMINIȚA-IOANA COTÎRLĂ* AND RÓBERT SZÁSZ

Abstract. We will prove the Brannan conjecture provided that the parameters α and β verify the conditions $\frac{3}{4} \leq \alpha \leq \beta \leq 1$. The basic tool of the study is a new integral representation deduced in this paper.

Mathematics subject classification (2020): 30C10, 30C50.

Keywords and phrases: Brannan's conjecture, numerical approach, new integral representation.
