

A REFINEMENT OF A THEOREM OF PAUL TURAN CONCERNING POLYNOMIALS

ABDUL AZIZ AND NISAR AHMED RATHER

Abstract. In this paper we establish certain sharp results concerning the maximum modulus of the polar derivative of a polynomial $P(z)$ with restricted zeros. Our results generalize and refine some results of Turán, Malik, Govil and others.

Mathematics subject classification (1991): 30A10, 30C10, 30D15.

Key words and phrases: Inequalities, polar derivatives, self-reciprocal polynomials.
