

DIFFERENTIAL AND INTEGRAL f -MEANS AND APPLICATIONS TO DIGAMMA FUNCTION

NEVEN ELEZOVIĆ AND JOSIP PEČARIĆ

Abstract. Some basic comparison theorems between two elementary means — differential and integral f -mean are obtained. This theorems are applied to digamma function.

Mathematics subject classification (1991): 26D10, 33B15.

Key words and phrases: Differential mean, integral mean, convex function, digamma function.
