ANTI-PERIODIC BOUNDARY VALUE PROBLEM FOR NONLINEAR FIRST ORDER ORDINARY DIFFERENTIAL EQUATIONS

DANIEL FRANCO, JUAN J. NIETO AND DONAL O’REGAN

Abstract. We prove several new existence results for a nonlinear anti-periodic first order problem using a Leray-Schauder alternative. Two definitions of lower and upper solutions are presented and we show in this paper the validity of the lower and upper solution method. Also, we give a method to generate a sequence of approximate solutions converging to a solution of the anti-periodic problem.

Key words and phrases: Anti-periodic boundary value problem, Leray-Schauder alternative, upper and lower solutions.
