TWO EXTRAPOLATION THEOREMS FOR RELATED WEIGHTS AND APPLICATIONS

M. LORENTE AND M. S. RIVEROS

Abstract. In this paper we prove two extrapolation theorems for related weights. The theorems proved by C. Segovia and J. L. Torrea in [C. Segovia and J. L. Torrea, Weighted inequalities for commutators of fractional and singular integrals, Publ. Mat. 35, (1991), 209–235] are adapted for one-sided weights. We apply these extrapolation theorems to improve weighted inequalities for commutators (with symbol $b$ depending on the related weights) of several one-sided operators such as the Weyl and the Riemann-Liouville fractional integrals, or one-sided maximal operators given by the convolution with a smooth function. We also characterize the symbols $b$ for which the commutators of these one-sided operators are bounded.

Key words and phrases: extrapolation, one-sided weights, one-sided operators, commutators.
