

CERTAIN INEQUALITIES AND THEIR APPLICATIONS TO MULTIVALENTLY ANALYTIC FUNCTIONS-II

HÜSEYİN IRMAK

Abstract. In the present investigation, some results concerning multivalently analytic functions and fractional calculus which were recently obtained in [4, *Math. Inequal. Appl.* **8** (3) (2005), 451–458] are restated by using a different technique proposed by M. Nunokawa [10, *Proc. Japan Acad. Ser. A Math. Sci.*, **68**, 6 (1992), 152–153].

Mathematics subject classification (2010): 30C45, 26A33.

Keywords and phrases: Multivalently analytic functions, multivalently starlikeness, multivalently convexity, multivalently close-to-convexity, unit disk, fractional calculus, principal values, inequalities, Nunokawa's result.
