ON THE TRIEBEL–LIZORKIN SPACE BOUNDEDNESS OF MARCINKIEWICZ INTEGRALS ALONG COMPOUND SURFACES

FENG LIU

Abstract. In this paper the author present the boundedness of Marcinkiewicz integral operators associated to compound surfaces with rough kernels given by $h \in \Delta_\gamma(R_+)$ and $\Omega \in L((\log^+ L)^{1/2}(S^{n-1}) \cup (\cup_{1<r<\infty} B^{\alpha-1/2}(S^{n-1}))$ on Triebel-Lizorkin spaces and Besov spaces. The main results of this paper represent improvements as well as natural extensions of many previously known results.

Keywords and phrases: Marcinkiewicz integrals, rough kernels, compound surfaces, Triebel-Lizorkin spaces, Besov spaces.
