SOBOLEV’S INEQUALITIES FOR HERZ–MORREY–ORLICZ SPACES ON THE HALF SPACE

YOSHIHIRO MIZUTA, TAKAO OHNO AND TETSU SHIMOMURA

Abstract. We introduce Herz-Morrey-Orlicz spaces on the half space, and study the boundedness of the Hardy-Littlewood maximal operator. As an application, we establish Sobolev’s inequality for Riesz potentials of functions in such spaces, which is one of mixed norm type inequalities.

Keywords and phrases: Herz-Morrey-Orlicz spaces, maximal functions, Riesz potentials, Sobolev’s inequality.
