

## DETERMINANT REPRESENTATIONS OF APPELL POLYNOMIAL SEQUENCES

YONGZHI YANG

*Abstract.* In this paper, we develop a new representation for Appell polynomial sequence via determinants. In addition, we demonstrate a direct application of this determinant formula (representation) for Appell sequence by deriving a determinant formula for a power series of a function  $f(t)$  in terms of the power series of its algebraic inverse function  $1/f(t)$ .
