

THE HAUSDORFF MEASURE OF NONCOMPACTNESS OF MATRIX OPERATORS ON SOME BK SPACES

M. MURSALEEN AND ABDULLAH K. NOMAN

Abstract. In the present paper, we establish some identities or estimates for the operator norms and the Hausdorff measures of noncompactness of certain matrix operators on the spaces c_0^λ and ℓ_∞^λ which have recently been introduced in [On the spaces of λ -convergent and bounded sequences, Thai J. Math. 8(2) (2010) 311–329]. Further, by using the Hausdorff measure of noncompactness, we characterize some classes of compact operators on these spaces.

Mathematics subject classification (2010): 46B15, 46B45, 46B50.

Keywords and phrases: BK space, matrix transformation, compact operator, Hausdorff measure of noncompactness.
