

MEASURE OF NONCOMPACTNESS AND FRACTIONAL HYBRID DIFFERENTIAL EQUATIONS WITH HYBRID CONDITIONS

CHOUKRI DERBAZI, HADDA HAMMOUCHE, ABDELKRIM SALIM*
AND MOUFFAK BENCHOHRA

Abstract. This paper deals with the existence of solutions for hybrid fractional differential equations involving Caputo fractional derivative of order $2 < \zeta \leq 3$. We base our arguments on a generalization of Darbo's fixed point theorem combined with the approaches related with measures of noncompactness in Banach algebras. To demonstrate the argument, an illustration is provided.

Mathematics subject classification (2020): 34A08, 34A12.

Keywords and phrases: Fractional differential equation, Caputo fractional derivative, hybrid, Darbo's fixed point theorem, measure of noncompactness, Banach algebra.
