

## A NEW GENERALIZATION OF $q$ -HERMITE-HADAMARD TYPE INTEGRAL INEQUALITIES FOR $p$ , $(p-s)$ AND MODIFIED $(p-s)$ -CONVEX FUNCTIONS

GHAZALA GULSHAN, RASHIDA HUSSAIN AND HÜSEYIN BUDAK\*

**Abstract.** In this study, we develop three new quantum Hermite-Hadamard inequalities for the class of  $p$ ,  $(p-s)$  and modified type  $(p-s)$ -convex functions by utilizing left and right quantum integral. As special cases of these inequalities, we get known and new Hermite-Hadamard type inequality for modified type  $(p-s)$ -convex functions. The ideas and techniques of this article may be the starting point for further research in this field.

*Mathematics subject classification (2020):* 05A30, 26D15, 26A51.

*Keywords and phrases:* Hermite-Hadamard inequality,  $p$ -convex functions,  $(p-s)$ -convex functions, modified  $(p-s)$ -convex functions,  $q^b$ -integral,  $q_a$  integral.
