

## AN ALTERNATIVE APPROACH TO IDEAL WIJSMAN CONVERGENCE

HÜSEYİN ALBAYRAK\*, ÖZNUR ÖLMEZ AND SALIH AYTAR

**Abstract.** The concept of Wijsman convergence of a sequence of sets was defined using the pointwise convergence of the sequence of distance functions. Based on this idea, in this article, a new type of set convergence is obtained by using the concept of ideal  $\alpha$ -convergence for the sequence of distance functions. Then it is shown that this new convergence is equivalent to the Wijsman convergence according to the specific choice of ideal.

**Mathematics subject classification (2020):** 40A05, 40A35, 26A99, 54A20.

**Keywords and phrases:** Sequences of sets, Wijsman convergence,  $\mathcal{I}$ -convergence,  $\alpha$ -convergence, equicontinuity.
