

A VARIANT OF JENSEN'S INEQUALITY FOR CONVEX FUNCTIONS OF SEVERAL VARIABLES

ANITA MATKOVIĆ AND JOSIP PEČARIĆ

Abstract. Two Jensen's type inequalities for convex functions defined on \mathbb{R}^k which involve elements of convex hulls are given. As their consequences the comparison theorem for weighted L -conjugate means and a Mercer's result are obtained.

Mathematics subject classification (2000): 26D15, 26B25.

Key words and phrases: Jensen's inequality, convex functions, convex hull.
