

SOME INEQUALITIES REGARDING A GENERALIZATION OF IOACHIMESCU'S CONSTANT

ALINA SÎNTĂMĂRIAN

Abstract. The purpose of this paper is to evaluate the limit $\mathcal{I}(a)$ of the sequence

$$\left(\frac{1}{\sqrt{a}} + \frac{1}{\sqrt{a+1}} + \cdots + \frac{1}{\sqrt{a+n-1}} - 2(\sqrt{a+n-1} - \sqrt{a}) \right)_{n \in \mathbb{N}},$$

where $a \in (0, +\infty)$. We give some lower and upper estimates for

$$\frac{1}{\sqrt{a}} + \frac{1}{\sqrt{a+1}} + \cdots + \frac{1}{\sqrt{a+n-1}} - 2(\sqrt{a+n-1} - \sqrt{a}) - \mathcal{I}(a), \quad n \in \mathbb{N}.$$

Mathematics subject classification (2010): 11Y60, 40A05.

Keywords and phrases: Sequence, convergence, Ioachimescu's constant, approximation, estimate.
