

ON HADAMARD'S INEQUALITIES FOR THE CONVEX MAPPINGS DEFINED IN TOPOLOGICAL GROUPS AND A CONNECTED RESULT

ALI MORASSAEI

Abstract. In this paper, we study the Hadamard's inequality for midconvex and quasi-midconvex functions in topological groups. A mapping naturally connected with this inequality and a related result is also pointed out.

Mathematics subject classification (2010): Primary 26A51, 22A10, Secondary 26D07, 26D15.

Keywords and phrases: Convex functions, Hadamard's inequality.
