

OPIAL-TYPE INEQUALITIES FOR TWO FUNCTIONS WITH GENERAL KERNELS AND APPLICATIONS

SAJID IQBAL, JOSIP PEČARIĆ AND MUHAMMAD SAMRAIZ

Abstract. In this paper, we establish new Opial-type inequalities for general kernels. We prove the converse of our general result and related extreme case. As applications of our main results we extract the results of [12]. We provide the related applications for Widder's derivative and linear differential operator. At the end, we give the discrete analogue corresponding to our main results.

Mathematics subject classification (2010): 26D15, 26D10, 26A33.

Keywords and phrases: Opial inequality, fractional derivatives, Widder derivatives, Green's function, linear differential operator.
