

COMMUTATORS OF MULTILINEAR CALDERÓN-ZYGMUND OPERATORS WITH KERNELS OF DINI'S TYPE AND APPLICATIONS

PU ZHANG AND JIE SUN

Abstract. Let T be a multilinear Calderón-Zygmund operator of type ω with $\omega(t)$ being non-decreasing and satisfying a kind of Dini's type condition. Let $T_{\overline{\Pi}^B}$ be the iterated commutators of T with BMO functions. The weighted strong and weak $L(\log L)$ -type endpoint estimates for $T_{\overline{\Pi}^B}$ with multiple weights are established. Some boundedness properties on weighted variable exponent Lebesgue spaces are also obtained. As applications, multiple weighted estimates for iterated commutators of bilinear pseudo-differential operators and paraproducts with mild regularity are given.

Mathematics subject classification (2010): 42B20, 42B25, 47G30, 35S05, 46E30.

Keywords and phrases: Multilinear Calderón-Zygmund operator, bilinear pseudo-differential operator, paraproduct, commutator, multiple weight, variable exponent Lebesgue space.
