

A GENERALIZATION OF YOUNG'S ℓ^p INEQUALITY

JONATHAN M. BORWEIN

Abstract. We show that, for positive real numbers with $a \geq 1 + \sum_i^N \alpha_i$, the function

$$\frac{t^a}{\prod_{i=1}^N x_i^{\alpha_i}}$$

has a convex conjugate of the same form and so, in particular, obtain a clean proof that f is convex.

Mathematics subject classification (1991): Primary 52A41, Secondary 90C25, 26A51.

Key words and phrases: Fenchel conjugate, Young's ℓ^p -inequality, convexity.
