

BERNSTEIN–DOETSCH TYPE RESULTS FOR QUASICONVEX FUNCTIONS

ATTILA GILÁNYI, KAZIMIERZ NIKODEM AND ZSOLT PÁLES

Abstract. In this paper various quasiconvexity notions are considered and compared. The main goal is to show that, under the assumption of upper semicontinuity, Jensen-type quasiconvexity properties are equivalent to the corresponding ordinary quasiconvexity property. The results thus obtained are analogous to the classical theorem of Bernstein and Doetsch for convex functions.

Finally, the connection between approximate Jensen quasiconvexity and approximate quasiconvexity is investigated.

Mathematics subject classification (2000): 26B25, 39B62.

Key words and phrases: quasiconvex function, Jensen-quasiconvex function, ε -Jensen-quasiconvex function, upper semicontinuity.
