

JACOBI NORMING MESHES

FEDERICO PIAZZON AND MARCO VIANELLO

Abstract. We prove by Bernstein inequality that Gauss-Jacobi(-Lobatto) nodes of suitable order are L^∞ norming meshes for algebraic polynomials, in a wide range of Jacobi parameters. A similar result holds for trigonometric polynomials on subintervals of the period, by a nonlinear transformation of such nodes and Videnskii inequality.

Mathematics subject classification (2010): 26D05, 41A10, 42A05, 65T40.

Keywords and phrases: Polynomial inequalities, trigonometric polynomial inequalities, univariate norming meshes, Jacobi polynomials.
