

ON THE INJECTIVE NORM OF $\sum_{i=1}^n A_i \otimes B_i$ AND CHARACTERIZATION OF NORMALOID OPERATORS

AMEUR SEDDIK

Abstract. Let $\mathcal{B}(H)$ denotes the C^* -algebra of all bounded linear operators acting on the complex Hilbert space H . In this note, we shall give some lower estimates for the injective norm of the element $\sum_{i=1}^n A_i \otimes B_i$ in the tensor product $\mathcal{B}(H) \otimes \mathcal{B}(H)$, where $A = (A_1, \dots, A_n)$ and $B = (B_1, \dots, B_n)$ are two n-tuples of elements in $\mathcal{B}(H)$; and we shall characterize the normaloid operators in $\mathcal{B}(H)$ using the injective norm.

Mathematics subject classification (2000): 47B47.

Key words and phrases: Elementary operator, generalized derivation, standard operator algebra, rank one operator.
