

## INEQUALITIES FOR THE $\lambda$ -WEIGHTED MIXED ARITHMETIC-GEOMETRIC-HARMONIC MEANS OF SECTOR MATRICES

SONG LIN AND XIAOHUI FU

**Abstract.** In this note, we first explain a minor error in the literature [3]. Secondly, we prove the  $\lambda$ -weighted mixed arithmetic-geometric-harmonic-mean inequalities of  $A$  and  $B$  which are the generalizations of the results already introduced in [3]. Finally, we extend our results to sums of  $n$  ( $n \geq 2$ ) sector matrices.

*Mathematics subject classification (2010):* 47A63, 15A45.

*Keywords and phrases:* Arithmetic mean, geometric mean, harmonic mean, sector matrix.
