

**CORRIGENDUM TO: POSITIVE SOLUTIONS FOR A FOURTH  
ORDER DIFFERENTIAL INCLUSION WITH BOUNDARY  
VALUES, PUBLISHED IN DIFFERENTIAL EQUATIONS AND  
APPLICATIONS VOL. 8 NO. 1 (2016), 21—31, BY JOHN S. SPRAKER**

JOHN S. SPRAKER

*Abstract.* In Theorem 3 of [2] I included an extension to the Ascoli theorem. While the statement of the theorem and its later use were correct, the proof has a slight error which I noticed while in the process of writing a sequel. Also a few comments about the complete continuity of an operator are provided as well as an additional reference.

*Mathematics subject classification (2010):* 34B18, 34A34, 34A36, 34A60, 34B15, 47H10.

*Keywords and phrases:* existence of solutions, fourth order differential inclusion, fixed point, boundary value problem, Ascoli theorem.
