

HOMOGENIZATION OF A NON-PERIODIC OSCILLATING BOUNDARY VIA PERIODIC UNFOLDING

S. AIYAPPAN*, K. PETERSSON AND A. SUFIAN

Abstract. This paper deals with the homogenization of an elliptic model problem in a two-dimensional domain with non-periodic oscillating boundary by the method of periodic unfolding. For the non-periodic oscillations, a modulated unfolding is used. The L^2 convergence of the solutions and their fluxes are shown, under natural hypotheses on the domain.
