

SOME RELATIONS BETWEEN CERTAIN CLASSES OF ANALYTIC FUNCTIONS

PRANAY GOSWAMI, TEODOR BULBOACĂ AND SANJAY K. BANSAL

Abstract. In the present paper we introduce and studied two subclasses of multivalent functions denoted by $\mathcal{M}_{p,n}^\lambda(\gamma; \beta)$ and $\mathcal{N}_{p,n}^\lambda(\mu, \eta; \delta)$. Further, by giving specific values of the parameters of our main results, we will find some connection between these two classes, and moreover, several consequences of main results are also discussed.

Mathematics subject classification (2010): 30C45.

Keywords and phrases: Analytic functions, multivalent functions, starlike functions, convex functions, Bazilević functions..
