

## ON SOME INEQUALITIES FOR DERIVATIVES OF POLYNOMIALS AND RATIONAL FUNCTIONS

S. I. KALMYKOV

*Abstract.* Using methods of geometric function theory, we get new inequalities for derivatives of polynomials and rational functions. These theorems refine and supplement some known results.

*Mathematics subject classification (2010):* 30C10, 30C80, 30A10.

*Keywords and phrases:* Polynomials, rational functions, Bernstein-type inequality, Chebyshev polynomials.
