

IMPROVEMENTS OF GENERALIZED HÖLDER'S INEQUALITIES AND THEIR APPLICATIONS

JING-FENG TIAN, MING-HU HA AND CHAO WANG

Abstract. In this paper, we present some new improvements of generalized Hölder's inequalities, and then we obtain a new refinement of Minkowski inequality. Moreover, the obtained results are used to improve Chung's inequality and Beckenbach-type inequality proposed by Wang.

Mathematics subject classification (2010): 26D15, 26D10.

Keywords and phrases: Hölder's inequality, Minkowski inequality, Beckenbach-type inequality, Chung's inequality.
