

A MATRIX INEQUALITY FOR UNITARILY INVARIANT NORMS

XIN JIN, FENG ZHANG AND JINLI XU*

Abstract. In this paper, we present an inequality of matrix norms, which is a generalization of the inequality shown by Zou [Linear Algebra Appl. 562, 154–162].

Mathematics subject classification (2020): 15A60, 47A63.

Keywords and phrases: Arithmetic-geometric mean inequality, unitarily invariant norms, majorization.
