

## REFLEXIVITY OF OPERATOR ALGEBRAS OF FINITE SPLIT STRICT MULTIPLICITY

RALUCA DUMITRU, COSTEL PELIGRAD AND BOGDAN VISINESCU

*Abstract.* We study the invariant subspaces of abelian operator algebras of finite split strict multiplicity. We give sufficient conditions for the reflexivity and hereditary reflexivity of these algebras.

*Mathematics subject classification (2010):* Primary 47A15; Secondary 47L75.

*Keywords and phrases:* Operator algebras, reflexivity, finite strict multiplicity.
