

DISJOINT HYPERCYCLIC POWERS OF WEIGHTED TRANSLATIONS ON LOCALLY COMPACT HAUSDORFF SPACES

YA WANG AND HONG-GANG ZENG*

Abstract. In this article, we study the disjoint hypercyclic powers of weighted translations on the weighted space $L^p(G, \omega)$ in two cases, where G is a locally compact second countable Hausdorff space with a positive regular Borel measure and ω is a weight on G . In addition, some examples are given to illustrate our results.

Mathematics subject classification (2020): 47A16, 47B38, 46E15.

Keywords and phrases: Disjoint hypercyclic, weighted translation, locally compact Hausdorff space.
